Education

Bogazici University Sept. 2021 – May 2027 (Expected)
BSc Electrical and Electronics Engineering *Istanbul, Türkiye*
BSc Mathematics, Double Major GPA 3.70/4.00

Nanyang Technological University (NTU) Aug. 2024 – Dec. 2024
Exchange Program *Singapore*

Kayseri Science High School Sept. 2017 – June 2021
High school *Kayseri, Türkiye*

Experience

Undergraduate Research Oct. 2026 – Present
Technical University of Denmark – DTU Compute *Denmark*

- Continuing research under the supervision of *Assoc. Prof. Tobias K. S. Ritschel* on stochastic nonlinear Model Predictive Control (MPC) for flexible operations of the district heating systems.
- Extended the single-pipe district heating model and reformulated the MPC structure to account for nonlinear thermal dynamics and operational requirements.

Summer Internship *July 2026 – Sept. 2026*

- Dervied and implemented stochastic nonlinear MPC formulations incorporating chance constraints and uncertainty propagation.
- Integrated Kalman filtering for state estimation and evaluated open-loop and closed-loop controllers through Monte Carlo simulations.

Undergraduate Research Jan. 2026 – Present
Koç University – Robotics and Mechatronics Laboratory (RML) *Istanbul, Türkiye*

- Continuing research under the supervision of Prof. Çağatay Başdoğan on navigation for the visually impaired via haptic cues.
- Conducted human-subject studies to design and evaluate vibrotactile feedback signals for assistive navigation.
- Developed four haptic navigation strategies for visually impaired individuals using vibrotactile feedback signals identified through human-subject studies.
- Investigating risk-aware MPC for haptic navigation using LSTM-based human motion prediction, conformal prediction for uncertainty estimation, and online adaptation via RLS and LQT.

Summer Internship Aug. 2025 – Sept. 2025
ASELSAN – UGES *Ankara, Türkiye*

- Worked in the Railway Signalization and Control team within the Department of Transportation Systems Engineering.
- Developed a route decision algorithm and a train simulation model to analyze motor characteristics.

Research Internship Aug. 2024 – Dec. 2024
Nanyang Technological University *Singapore*

- Contributed to B-Scan imaging of tree trunks using radar for decay detection under the supervision of Prof. Abdulkadir C. Yucel.

Summer Research Internship June 2024 – July 2024
TUBITAK Bilgem *Istanbul, Türkiye*

- Worked on Differential Cryptanalysis in the Cryptographic Algorithms and Protocol Design Department at the National Research Institute of Electronics and Cryptology (UEKAE).
- Analyzed vulnerability to differential attacks in selected cryptographic algorithms.

Student Assistant Oct. 2023 – Jan. 2024
Bogazici University *Istanbul, Türkiye*

- *Math 201 - Matrix Theory*

Communities

Volunteer Member Aug. 2024 – Dec. 2024
Vision of Hope - NTU Welfare Service Club Regular Service Project *Singapore*

- Supported the visually impaired community through regular programs and events such as house services and outings.

Director of Robotics & Automation Society (RAS) June 2022 – June 2023
BUEC - Bogazici University IEEE Student Branch *Istanbul, Türkiye*

- Organized a Robot Cup event hosting over 400 participants
- Arranged C++ and Python training sessions for undergraduate students.

Achievements

National University Entrance Exam *June 2021*

- Ranked 394th nationwide among over two million participants.

International Mathematical Modeling Challenge (IM2C) *June 2020*

- Secured 1st place nationally and received an Honorable Mention internationally.

Relevant Coursework

Linear System Theory
Introduction to Robot Control
System Dynamics and Control
Probability for EE
Numerical Methods for Electrical Engineering
Metric Spaces
Group Theory
Machine Learning Methods and Neural Networks
Nonlinear Dynamics
Control Technology & Design
Signals and Systems I–II
Advanced Calculus I–II
Introduction to Image Processing

Technical Skills & Interests

Languages:Turkish (Native), English (Advance)
Programming Languages: C/C++, MATLAB, Python, Julia, VHDL
Frameworks: ROS1/2, Gazebo, Isaac Sim
Interests: Music (guitar & violin), Camping (licensed), Archery (licensed), Skiing, Traveling
